Albin Karlsson

Software Developer (student) · Jönköping, Sweden

albin.karlsson2017@outlook.com · LinkedIn · GitHub · Portfolio

Profile

Second-year student in Software Development and Mobile Platforms at Jönköping University, looking for an internship and a thesis project. Before my studies I worked as a chef and trained as an electrician. I strongly believe in working with what you genuinely enjoy, and in my free time I build my own home server, home automation and web apps.

Projects

Homelab · github.com/albinkarlsson1999/homelab

- Self-hosted server (Raspberry Pi 5) running around ten services in Docker, including Home Assistant, PostgreSQL, Pi-hole and Jellyfin
- Every service is deployed automatically from GitHub through Portainer (GitOps); secrets are kept out of Git
- Traefik reverse proxy with HTTPS via Let's Encrypt; VLAN-segmented network and remote access via Cloudflare Tunnel and WireGuard

CO-Calendar · Web app, team project · GitHub

- Shared calendar and list app in Node.js, Express and MariaDB, built together with a classmate
- Responsible for security: signed cookies to prevent session tampering and protection against XSS

Portfolio · albinkarlsson1999.github.io/portfolio

- Bilingual website in React and Vite, deployed automatically with GitHub Actions

Education

Jönköping University, School of Engineering · 2025–2028 (ongoing) BSc programme in Software Development and Mobile Platforms, 180 ECTS

- Courses include object-oriented programming (Java), databases and web development

Komvux (Swedish adult education) · 2024–2025 University preparatory courses

Astar, Jönköping · 2020–2022 Culinary training, adult vocational education

Gislaved Upper Secondary School · 2015–2019 Electrical and Energy Programme, electrician

Work experience

Chef · Various restaurants and kitchens in Jönköping · 2020–2024

- Worked at a fast pace with tight deadlines and high standards for quality and hygiene
- Worked closely in a team to deliver on time, every service

Electrician · Small electrical contractor · 2019–2020

- Installed and troubleshot electrical systems according to regulations and safety standards
- Read and followed technical drawings and documentation

Retail assistant · Part-time · 2017–2020

- Customer service, checkout and restocking alongside my studies

Technical skills

- **Languages and frameworks:** JavaScript, React, Node.js, Express, Java, HTML/CSS
- **Databases:** SQL (MariaDB, PostgreSQL)
- **Tools and operations:** Docker, Linux, Git, GitHub Actions, Traefik
- **Hardware and IoT:** Home Assistant, ESP32, Raspberry Pi

Languages

Swedish (native) · English (fluent)

Other

Driving licence (B). Interests: sourdough baking, gardening, retro games and home automation.
